

Nasrin Akter

Software Engineer

✉ nasrinakter1109@gmail.com ☎ 01929298674 📍 Shantibagh,Dhaka-1217

Profile

Dedicated Software Engineer with over 6 years of experience in designing, developing, and deploying enterprise-grade web applications using C#, .NET, and Node.js. I am proficient in ASP.NET Core Web API, Entity Framework, and microservices architecture with NestJS, Kafka, and Redis. Skilled in implementing SOLID principles, RESTful APIs, and ORM technologies, with a strong focus on clean code, unit testing, and CI/CD practices. Adept at database design and complex SQL queries for SQL Server, MongoDB, and PostgreSQL. Focused on delivering scalable and high-performance solutions in fast-paced, collaborative environments.

Professional Experience

Software Engineer, *SOFTIC*

02/2025 – Present

Project Name: Payget

Technologies: NestJS, PostgreSQL (Type ORM), Redis, Docker

- Developed a cryptocurrency payment gateway integrating third-party providers such as Alphapo .
- Implemented secure payment initiation, callback, and webhook handling for crypto transactions.
- Designed unified APIs to abstract multiple crypto providers under a single gateway interface.
- Integrated SMS and Email notification services to send real-time payment status updates (success, pending, failed) to users and merchants.
- Implemented transactional alerts, invoice notifications, and admin alerts using configurable templates.
- Ensured transaction validation, status reconciliation, and error handling for reliable payment processing.
- Applied security best practices for API authentication and sensitive payment data handling.

Project Name: Invoice & Billing Management System

Technologies: ASP.NET [🔗](#) Core Web API, Angular 16, SQL Server, Entity Framework Core, JWT, Docker

- Developed a billing and invoicing system to manage customers, invoices, and payment tracking
- Implemented secure authentication and authorization using JWT with role-based access control
- Built RESTful APIs for invoice generation, payment processing, and reporting
- Implemented pagination, filtering, and search functionality for handling large datasets
- Designed optimized SQL queries and database structure for high-performance data processing
- Developed reporting features including invoice summary, due reports, and payment history
- Containerized the application using Docker for easier deployment and scalability
- Followed clean architecture and SOLID principles for maintainable code structure

Project Name: Support Chat

Technologies: ExpressJS, MongoDB, Socket IO, Redis

- Developed a **multi-platform chatbot system** supporting Telegram, WhatsApp, and Facebook Messenger using Meta APIs.
- Designed and implemented a **multi-tenant architecture**, allowing multiple businesses (tenants) to manage their own customers, agents, and chat data independently within the same system.
- Built real-time messaging features using Socket.IO [🔗](#), enabling instant communication between users and support agents.

- Implemented **automated chatbot workflows** for handling common customer queries, reducing manual support workload.
- Designed scalable backend services to handle high-volume concurrent user interactions efficiently.
- Used Redis for caching and session management to improve system performance and response time.
- Managed chat history, user sessions, and tenant-specific configurations using MongoDB.
- Ensured data isolation and security across tenants with proper access control and validation mechanisms.

Project Name: Confidential Project

Technologies: NestJS, Microservice (Kafka), PostgreSQL (Prisma ORM), Docker, ElasticSearch

Services: Auth Service, Payment, Transaction Service, Rewards Service, Notification Service

Back-end Developer, Zaynax Limited

01/2021 – 01/2025

Project: Accounting System

Technologies: ASP.NET [🔗](#) Core Blazor, SQL Server, Entity Framework, Crystal Reports

- Designed core financial modules (Account Groups, Ledgers, Subledgers).
- Developed financial reports (Trial Balance, Balance Sheet, Ledger Summary).
- Managed multi-level ledger hierarchy and transactional consistency.
- Implemented fiscal year and accounting period logic.

Project Name: ZHealth

Technologies: NestJS, Microservice (Redis), MongoDB, Docker

Services: Product Service, Order Service, Payment Service (Bkash, Nagad, AmarPay, SSLCommerz), Communication Service (chat, video call)

Web Link: <https://zaynaxhealth.com> [🔗](#)

App Link: <https://play.google.com/store/apps/details?id=zaynaxhealth.com&pli=1> [🔗](#)

Project Name: Zdrop

Technologies: NestJS, Microservice (Redis, NATS), MongoDB, Docker

Services: Product Service, Order Service, Payment Gateway Integration, Notifications

Web Links: <https://zdrop.com.bd> [🔗](#)

App Link: <https://play.google.com/store/apps/details?id=com.zdrop.bd> [🔗](#)

Project Name: ERP Solution

Technologies: ASP.NET Core Web API, SQL Server

Modules: Accounting, HR, Invoice Accounting module, HR Module, Invoice Module.

Junior Software Engineer, Software Arena Ltd

09/2019 – 10/2021

Project Name: Human Resource Management

Technology: Angular 6, Asp Dot Net Core web API, Microsoft SQL Server

- Developed Salary, Allowance (Addition), and Deduction modules.
- Implemented dynamic payroll calculation logic.
- Built REST APIs for payroll processing.
- Optimized database queries for performance.

Name: ERP Solution

Technology: Angular 6, Asp Dot Net Core web API, SQL, Crystal Report

- Worked on Accounting, Sales & Purchase, Payroll, HR, Marketing modules.
- Developed financial and business reports using Crystal Reports.
- Wrote complex SQL queries and stored procedures.
- Contributed to scalable and modular system design.

Technical Skills

- **Languages:** C#, TypeScript, JavaScript
- **Frameworks & Libraries:** ASP.NET [🔗](#) Core, MVC, ADO .Net, Blazor, NodeJS, ExpressJS, NestJS, Angular10+, ReactJS, NextJS
- **Message Brokers & Caching:** Apache Kafka, Redis, NATS, RabbitMQ
- **Databases:** SQL Server, MongoDB, PostgreSQL, MySQL

- **DevOps & Tools:** Docker, Git, GitLab CI/CD
- **Other Tools & Technologies:** Crystal Reports, Prisma ORM, Elasticsearch, ClickUp

Education

Enterprise Systems Analysis & Design – C#, ISDB-BISEW IT Scholarship Program	2018 – 2019 Bangladesh
Master of Business Administration in Management, National University	2014 – 2015 Bangladesh

Certificates

- Enterprise Systems Analysis & Design – C#, ISDB-BISEW 2019

Languages

- Bangla
- English
